

PRESS RELEASE – June 8, 2026

FLX Networks Founder & CEO Brian Moran Featured on NYSE's ETF Central

BERNARDSVILLE, NJ, [June 8, 2026] – FLX Networks, the innovative network revolutionizing the engagement experience between asset and wealth managers, today announced that Founder & CEO Brian Moran was featured on ETF Central, recorded at the New York Stock Exchange and hosted by Bilal Little.

In a wide-ranging conversation, Brian shared the story behind FLX Networks and discussed how the platform is modernizing the connection between asset managers and wealth managers through digitization and workflow automation. He detailed how FLX has evolved into a multi-sided network - bringing asset managers and wealth managers onto a single platform and how technology, partnerships, and artificial intelligence are reshaping the future of client engagement across the industry.

The discussion explored the inefficiencies that inspired FLX's founding in December 2019, the realities asset managers face for building distribution in a fiduciary-driven environment, and a first look at the FLX Event Center, which digitizes the events process that asset and wealth managers have historically managed through spreadsheets and email.

"Everything I was witnessing in my personal life was moving toward do-it-yourself first, and then involving the human when it becomes complex or important," said Brian Moran, FLX Founder & CEO. "We built FLX to bring that same efficiency to asset and wealth management - connecting both sides more effectively so the people in those relationships can focus on what matters most."

The full conversation is available now on [ETF Central](#).

About FLX Networks

FLX Networks solves substantial pain points shared by asset management and wealth management firms. Through FLX Networks, Members unlock technology workflows that digitize and automate historically manual processes, while also accessing a curated marketplace of technology products, professional services, and strategic relationships. Members leverage FLX's purpose-built platform to better execute business strategies and improve productivity, drive cost savings, and support business growth.
